ORGANIZATION

OF THE CITY GOVERNMENT

Tuesday, March 25, 1924.

At ten o'clock in the forenoon of the above date, members-elect of the city council for the municipal year of 1924 and the members from the previous council met for organization at the city council room agreeably to the provisions of the city charter.

The oath of office was administered to the Mayor-elect, Hon. Charles H. Perkins by the City Solicitor, Theo S. Jewett, Esq.

And the City Solicitor administered the oath of office to the following councilmen-elect, viz:

Ward 1.—Charles J. Hayford

Ward 2.—William D. Kempton

Ward 3.—George E. Stevens

Ward 4.—Edward H. Shannon

Ward 5.—Frank H. Stone

Ward 6.—Earle D. Seaverns

Prayer was then offered by the Rev. James Nelson Seaver, after which the Mayor delivered his inaugural address.

INAUGURAL ADDRESS

OF

HON. CHARLES H. PERKINS

March 25, 1924.

GENTLEMEN OF THE COUNCIL:

In assuming this office for the second time, I wish to express to you and the people of Laconia my appreciation of the honor.

I assure you I feel it a privilege to work for our city and shall do my best to merit the confidence of those who have shown me such generous support.

We meet today to commence the work of another year and to pledge ourselves to the faithful performance of the varied duties required.

In our membership we miss the faces of three with whom it has been a pleasure to associate. I refer to Councilmen Barlow and Brodhead, who are to reside out of the wards, and to Councilman Huse, who, after several years of service, felt that he must be excused. I hope it will be possible for them to visit us often. In their places we greet Councilmen Hayford, Shannon and Stone.

During the past year we have been called upon to mourn twice with our nation. First because of the death of President Warren Gamaliel Harding and later by the death of Ex-President Thomas Woodrow Wilson.

With our state we have been called upon to mourn because of the death of a citizen, Ex-Governor Henry Brewster Quinby, who for many years was prominent in our community life.

In the death of a life-long resident, Charles W. Vaughan, we mourn the loss of a member of our first city government, one of New England's brightest editors and one always loyal to the best interests of the city.

At the time of the destructive fire that swept over our neighboring village of Canaan it was our privilege to assist in the hour of need.

It may be of interest to note some facts in connection with our city life.

During the past year, five dedications and re-dedications have taken place, the Laconia High School, Laconia Hospital, Salvation Army and the First Methodist Episcopal and Christian Churches.

The city has had the privilege of entertaining several large conventions and many delegate bodies. Our central location together with our accommodations and attractions are making our city a very desirable meeting place.

While business conditions have not been at all normal the past year our Building and Loan Association and Savings Banks have received over \$480,000.00 in net deposits and net real estate loans for over \$510,000.00 made. It is worthy of note, that while our savings were only 2¼ per cent. less than the previous year, the real estate loans were 260 per cent. more than the year before.

While it is not possible to analyze the above figures, it certainly does indicate a very sound condition. With investments in bonds and other securities, the indications are that they are bought to quite an extent by the small investor, while in the case of real estate, new houses and the changing over

of houses to accomodate more people is being done with the result that our housing conditions are being steadily improved.

In addition to new business property either in process of construction or being considered, the Laconia Savings Bank and the City Savings Bank are each remodeling their buildings and about doubling their areas.

Three of our public service corporations will this year undertake extensive improvements. Our Telephone Company has in process plans for practically doubling their present capacity and also improving the service with modern equipment.

The Laconia Gas & Electric Company will soon have brought to us 2000 more H. P. of electric current, which will increase our manufacturing possibilities, and the Laconia Water Company will lay another main pipe line from the corner of Clinton and Mechanic streets to the corner of Messer and Oak streets and connect with branch lines, thereby adding greatly to the security of a large section of our territory.

As our annual reports for the past year are at hand and the several departments of our city have made very complete reports and recommendations I will refer you to them for your consideration and only take up briefly a few matters.

BOARD OF PUBLIC WORKS

If you have followed the policy of our board, you will have noted their plan for steadily improving the conditions of the departments under their care. The projects of this year will be conducted along the same lines. We should meet with the board at an early date to consider this year's plan, to enable them to purchase needed supplies so that the work agreed upon may not be delayed.

DEPARTMENT OF EDUCATION

With the completion of our high school building and its equipment we have added greatly to the advantages of our young people. It also becomes a community center to which we can all go and meet each other in matters of common interest.

We have believed in maintaining a department that would rank well with the best in our state. Naturally its expenses have increased, but its affairs have been conducted at a very reasonable cost as compared with other cities and the higher salaries of nearby states with which we have to compete. Our school advantages have received much favorable comment and should attract to our city people who have the best interests of their families in mind and who will themselves be of the best type for our varied industries.

PARK COMMISSION

The increased value of the work of this commission has again been proven by the interest taken in the proper care and supervision of the children. In addition to the pleasure given, the children are taught many useful things. Much has been done in the past year to improve the grounds, particularly at Opechee Park. New equipment has been added to that of both Leavitt and Opechee play grounds. The work has now reached such proportions that better conveniences are needed to properly care for the children. Plans will be presented a little later for your study and co-operation.

FIRE DEPARTMENT

The past year has been one of the busiest in the history of the department. But during this time, while cities and towns all around us have suffered

severely by fire, Laconia has not met with any great loss.

Good fortune may account for a part of this, but good work by the department is responsible for a great deal more. Several fires started in places where but for prompt action there would have been much loss of property. Our present equipment is in good condition and our new alarm system has added greatly to the service. What is now really needed in equipment is a motorized ladder truck. With this we should be placed in a position to meet any emergency.

POLICE DEPARTMENT

Reference to the report of this department will enable you to see something of its value. The past year with its heavy automobile traffic created a situation hard to handle. At certain hours on the main street and in certain sections it was only by the utmost care that accidents were avoided. We should work with the department the best we can as like conditions will have to be met this coming season.

I would call your attention to the signal system of this department. It is in bad shape and is neither adequate nor reliable. Its improvement would mean added protection to our city.

BOARD OF HEALTH

In addition to the regular work of the department, I would call your attention to its recommendation in relation to the isolation hospital. This hospital has been of much service in the past but at this time it is not in proper condition to care for patients in case of an epidemic. Its location is not what it should be. The trustees of the Laconia Hospital have generously offered us a site on their

grounds, where, if occasion required, nursing and medical care could be given immediately. Such quick action might be of the greatest value. I would recommend that the buildings and such portion of land as is not needed for grading be sold and that the city build on the lot above mentioned a suitable building for isolation purposes.

TAXES

Last year we had over \$30,000.00 to pay from our appropriations which on the previous year had been available for general improvements. Two-thirds of this sum was applied to the first payment of our school bonds and interest. Because of the general business conditions we did not feel warranted in increasing the tax rate and the departments worked with us loyally.

This year we have a new condition, occasioned by the income tax.

We do not know at this time the amount of revenue this tax will return to the city, but it should reflect itself in a reduction of the tax on properties that have formerly borne the whole burden.

We hope we may not only relieve the burden as previously borne but secure funds to improve other conditions.

In conclusion, I am looking forward to a busy and pleasant year and ask of you each close co-operation that together we may give to Laconia, our "City on the Lakes," the best possible return for the confidence placed in us. I thank you for your attention.

MUNICIPAL REGULATIONS

FOR PAYMENT OF BILLS AGAINST THE CITY.

All bills against the city must be approved by the persons authorizing the charge; and unless this is done, no action can be had upon the bill by the committee on accounts and claims, and no order will be given for its payment.

When bills are certified to as above, and left with the City Clerk not later than Thursday at 12 o'clock M., preceding the last Monday of each month, they will be audited by the committee on accounts and claims, and if approved by them and allowed by the Council, will be ready for payment on the following Wednesday, at the office of the City Treasurer.

Meetings of the committee on accounts and claims are held on Friday preceding the last Monday of each month at 7:30 o'clock P. M., at the City Clerk's office.

CITY GOVERNMENT

LACONIA, N. H.

Inaugurated fourth Tuesday of March, yearly.
Stated meetings: The last Monday of each month at
7:30 o'clock P. M., at city council room, Masonic Tem-
ple, Main street.

Resolutions and Ordinances

RESOLUTIONS

In the Year of our Lord one thousand nine hundred and twenty-four.

A RESOLUTION appropriating money for the purchase of land adjoining Church street for the purpose of widening and straightening said street.

Resolved by the City Council of the City of Laconia, as follows:

Section 1. That the sum of Fifty-five Hundred Dollars (\$5500.00) be and hereby is appropriated for the purpose of paying the amount agreed upon by the City of Laconia and the Roman Catholic Bishop of Manchester Corporation Sole, to be paid for land to be taken by the City of Laconia adjoining Church street on the northerly side, said land to be taken for highway purposes, and the Mayor is hereby authorized to draw his warrant for the same out of any funds in the treasury not otherwise appropriated.

Passed and approved February 25, 1924.

CHARLES H. PERKINS,
Mayor.

In the Year of our Lord one thousand nine hundred and twenty-four.

A RESOLUTION appropriating money for the purchase of land adjoining Church street for purpose of widening said street.

*Resolved by the City Council of the City of Laconia,
as follows:*

That the sum of Twelve Hundred and Sixty-one and Fifty-three one hundredths dollars (\$1261.53) be and the same is hereby appropriated for the purpose of paying the amount agreed upon by the City of Laconia and Benjamin Piscopo to be paid for land to be taken by the City of Laconia adjoining Church St. on the northerly side, said land to be taken for highway purposes and the Mayor is hereby authorized to draw his warrant for the same.

Passed and approved February 25, 1924.

CHARLES H. PERKINS,

Mayor.

*In the Year of our Lord one thousand nine hundred
and twenty-four.*

A RESOLUTION authorizing temporary loans to an amount not exceeding One Hundred Eighty Thousand Dollars in anticipation of the taxes of the present municipal year.

*Resolved by the City Council of the City of Laconia,
as follows:*

That for the purpose of meeting current expenses of the city, the City Treasurer be and hereby is authorized and empowered to make temporary loans from time to time for the use of said City of sums not exceeding the aggregate amount of \$180,000.00, said loans being in the anticipation of the taxes of the present municipal year and hereby expressly made payable therefrom, and to give for such loans subject to the written approval of the Committee on Finance, notes of the City, each note

to become due and payable within one year from its date and no such note shall be valid unless authenticated by the certificate of the National Shawmut Bank of Boston, Massachusetts. Said notes shall be signed by the Mayor and City Treasurer and countersigned by the City Clerk, shall be registered in the books kept for that purpose in the offices of the City Treasurer and City Clerk respectively.

This resolution shall take effect upon its passage.

Passed and approved March 31, 1924.

CHARLES H. PERKINS,

Mayor.

In the Year of our Lord one thousand nine hundred and twenty-four.

A RESOLUTION raising money by taxation for the year ending February 15, 1925.

Resolved by the City Council of the City of Laconia, as follows:

That there shall be raised and there is ordered to be raised on the polls and the estate liable to be taxed within said city the sum of Three Hundred Sixty-three Thousand Three Hundred Twenty-five and Eleven One Hundredths (\$363,325.11) dollars to defray the necessary expenses and charges of the city for the financial year ending February 15, 1925.

Passed and approved July 9, 1924.

CHARLES H. PERKINS,

Mayor.

In the Year of our Lord one thousand nine hundred and twenty-four.

A RESOLUTION making appropriations for the year ending February 15, 1925.

\$406,882.11

Passed and approved July 9, 1924.

CHARLES H. PERKINS,
Mayor.

In the Year of our Lord one thousand nine hundred and twenty-four.

AN ORDINANCE in amendment of Section 6, Chapter 19 of the Revised Ordinances, Entitled Salaries.

Be it ordained by the City Council of the City of Laconia, as follows:

That Section 6, Chapter 19 of the Revised Ordinances, Entitled Salaries, be hereby amended by striking out the word "one" in the second line of said section and insert instead thereof the word, "two," so that said Section 6 shall read as follows:

Section 6. The city physician shall receive in full for his services the sum of two hundred dollars per annum, payable in equal semi-annual payments. This ordinance shall take effect as of April 1, 1924.

Passed and approved July 28, 1924.

CHARLES H PERKINS,
Mayor.

ADDENDUM

Resolutions passed since the foregoing Resolutions and Ordinances were printed.

In the Year of our Lord one thousand nine hundred and twenty-five.

A RESOLUTION authorizing the issuing of a note as security on trust funds.

Resolved by the City Council of the City of Laconia, as follows:

That the Treasurer of the City of Laconia be and is hereby authorized to make and execute a note to the Trustees of Trust Funds for the City of Laconia, for the sum of twenty-six thousand two hundred fifteen (\$26,215.) dollars and twenty-seven (27) cents, said note to be dated February 16, 1925, and be due and payable twelve months from date and bear interest at the rate of four percent., per annum, the said sum being the amount held by said City as Trust Funds and not otherwise secured, the income to be expended in care of various cemetery lots

Passed and approved February 16, 1925.

CHARLES H. PERKINS,

Mayor.

In the Year of our Lord one thousand nine hundred and twenty-five.

A RESOLUTION appropriating the sum of \$16,875.15 to cover special appropriations previously authorized and in payment of certain deficiencies of the various departments.

Resolved by the City Council of the City of Laconia, as follows:

That the sum of \$16,875.15 be and the same is hereby appropriated to cover the special appropriations previously authorized and for payment of certain deficiencies of the various departments as follows:

SPECIAL APPROPRIATIONS

Bathing Beach, Weirs	\$ 250.00
Rocky Pond road	2,500.00

High School equipment	581.48
	\$11,385.15

And be it further resolved that the City Treasurer be and is hereby authorized to borrow said amounts on notes of the city said notes to become due and payable within three months from this date and to bear interest not exceeding six per cent
Passed and approved February 16, 1925.

CHARLES H. PERKINS,
Mayor.

In the Year of our Lord one thousand nine hundred and twenty-five.

AN ORDINANCE fixing the salary of the Collector of Taxes, and repealing Section 6 of Chapter 6 of the Revised Ordinances of the City of Laconia, of 1916, entitled "An Ordinance revising and arranging the Ordinances of the City," and an ordinance entitled "An ordinance in Amendment of Chapter 6, Section 6, of the Revised Ordinances entitled 'Tax Collectors and Collection of Taxes,' as amended by an Ordinance passed and approved, August 27, 1917, passed and approved June 29, 1920," and an ordinance entitled "An ordinance in amendment of Chapter 6, Section 6, entitled Tax Collectors and Collection of Taxes, of Revised Ordinances, passed and approved June 29, 1920, "passed and approved, November 26, 1923."

Be it ordained by the City Council of the City of Laconia, as follows:

Section 1. The Collector of Taxes shall receive in full for his services in the collection of taxes of each year, the sum of eighteen hundred dollars, which shall be paid in equal monthly payments of one hundred fifty dollars each.

Section 2. The official year, for the purpose of this ordinance, shall begin on the first day of July.

Section 3. The sum of Eight Hundred Dollars is annually appropriated for general clerical expenses in the Collector's office, which amount shall be in full for clerk hire and allowances of every kind in connection with said office, and no part of said additional appropriation shall be paid to the Tax Collector for any service performed by him.

Said additional appropriation shall be paid only upon statements for service performed, approved by the City Council.

Section 4. All ordinances and resolutions now in force and effect inconsistent with this ordinance are hereby repealed, and this ordinance shall take effect on its passage.

Passed and approved February 16, 1925.

CHARLES H. PERKINS,

Mayor.

Department Reports

REPORT OF SCHOOL BOARD

To the Honorable Mayor and City Council:

The School Board herewith submits its annual report. Attention is called particularly to the report of the Superintendent which discusses in detail the operation of our educational system, the work of the teachers and our needs for the future.

Owing to the fact that the fiscal year of the school district closes on the thirtieth of June and the fiscal year of the city closes on the fifteenth day of February, there is bound to be always some confusion with regard to the ground covered, particularly that relating to finances. The School Board a year ago submitted to the City Council a very carefully prepared budget which estimated the need of an appropriation of \$110,000 for school purposes. The appropriation made was \$100,000, the request of the Board being cut to the extent of \$10,000. At the end of the year there was a deficit, as we expected, of approximately \$7,600. This last year we requested of the City Council an appropriation of \$110,000 and were cut to \$105,000. Request was made of us by the City Council not to exceed our appropriation. The City Council was advised that it would be impossible to conduct the schools throughout the year on the sum granted. We now have five more months to operate for the current year, and it is already apparent that the appropriation will be insufficient to meet the needs. In accordance with the request of the City Council, we hereby

notify you that the money raised for the needs of the schools will be insufficient to complete the year, and if you desire to make no further appropriation the schools will have to be closed commencing about June first. In view of existing conditions it is necessary for school boards to make their contracts with teachers, their contracts for supplies, for fuel and for all other service in the spring of the year. These contracts were all made by the School Board last spring before the City Council got around to consult with us as to our needs. Our requests of the Council were based on actual contracts made and on figures which could not be varied. Nevertheless, the cut in the estimate was made by the Council, and we shall abide by the result, if the City Council desires to take the responsibility.

Of course, one of two courses should be pursued. Either the City Council should demand an estimate of the School Board early enough in the season so that if proposed contracts are not to be approved, that disapproval should be known before the contracts are executed, or, the contracts having been made the City Council should appropriate sufficient funds with which to meet them.

Not one dollar of the school money is being extravagantly used. There are many things which our school system needs which we have denied ourselves because of the increased expense incurred through the construction of the new high school building and the consequent annual heavy demand for payment of principal and interest thereon.

There has been considerable local disturbance and discussion over various matters pertaining to the school system during the current year by the general public, based unfortunately practically wholly on misrepresentation and ignorance of the facts. The public has been informed many times

that the meetings of the School Board are open to anyone, and that they are held monthly at the office of the superintendent in the new high school building on the Monday preceding the last Monday in each month, generally at 7:30 in the evening. During the last year no member of the public has attended any one of the meetings. Therefore, no member of the public was in possession of first-hand information of facts relating to the school system, which would have been readily available by attendance at School Board meetings. The rules of the board and the rules governing teachers have been adopted, and are printed and are available to anyone on request made of the Superintendent. It is always to be hoped that in a matter of such vital interest to the people of Laconia as their public schools, constructive criticism may be had, but that it may always be based on an adequate foundation of the facts and not upon rumor and prejudice.

Respectfully submitted,

BOARD OF EDUCATION.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board of Laconia:

Gentlemen:

I herewith present to you my annual report for the school year, July 1, 1923, to June 30, 1924, together with information regarding the present school year.

STATISTICS FOR THE YEAR ENDING JUNE 30, 1924.

	Elem. grades	Junior High	Senior High	Even schools	Special	Total
Teaching positions: Men	. .	. .	8	5	3	16
Women	24	7	11	11	1	54
Different pupils enrolled	818	214	389	275	. .	1696
Half days of school	347	366	366	60	. .	. .
Half days closed	13	14	14	. .	. .	. .

Average attendance, Grades I to VIII	905
Average Absence	42
Average Membership	947
Average Attendance, Grades IX to XII	345
Average Absence	13
Average Membership	358
Per cent. of Attendance for all Schools	95.78
Cases of Tardiness	468
Not Absent or Tardy During the Year	125
Visits to all Schools by School Board	11
Visits to all Schools by Superintendent	567

Visits to all Schools by Citizens	2,447
Average salaries of Men Teachers;	
secondary	\$1,715.00
Average salaries of Women Teachers;	
secondary	1,427.00
Average salaries of Women Teachers;	
elementary	1,200.00

Comparison of the enrolment of last year with that of the year ending June 30, 1923, shows that the number in the grades last year was nineteen less than in the previous year, while the high school enrolment was 34 larger, and the number in the evening school was 81 larger than for the previous year.

There were but two changes in the teaching staff last year: One elementary teacher was given permission to resign to accept a much better position financially in another state; one teacher in the High School gave up teaching during the year.

PROMOTION AND RETARDATION.

	I	II	III	IV	V	VI	VII	VIII	IX	X	XI	XII
Pupils promoted to next grade	111	137	120	100	102	108	79	75	113	80	44	46
Pupils not promoted	22	9	5	11	5	10	21	16	14	8	6	2

Many pupils in the elementary grades failed of promotion because of sickness, frequent moving and change of schools, backwardness and slow mental development, and lack of knowledge of the English language. I repeat my recommendation of one year ago, "These children should be in classes by themselves where special work could be given them that would meet their needs." Laconia owes these children the best possible development that they are capable of.

Failures in the upper grades are due to these

same reasons, and to a spirit of restlessness, "I'll-get-by-somehow," or "I-don't-care" attitude.

Parents by their co-operation with the School can help in correcting and improving these conditions.

Comparison with the averages for all of the high schools in the state are given for the last five years.

	1919-20		1920-21		1921-22		1922-23		'23-24	
	Lac.	State aver	Lac.	State	Lac.	State	Lac.	State	Lac.	State
1. % left school	18	16	9	14	15	13	23	13	19	13
2. % failed in one course	13	9	9	9	13	8.6	9	8.9	11	9.1
3. % failed in more than one course	11	8	9	8	14	6.8	13	7.2	12	8
4. % graduates to number entered in class . . .	41	52	48	59	40	55.9	35	52.6	46	59.5

The total expenditures for the fiscal year ending June 30, 1924, were \$139,984.88. This amount was distributed as follows:

ADMINISTRATION

Salaries of School Board	\$ 100.00
Superintendent's excess salary	2,000.00
Truant Officer and Census	828.50
Expenses of Administration	1,852.51

INSTRUCTION

Teachers salaries	\$70,517.00
Evening Schools	1,706.34
Textbooks	3,647.68
Scholars' supplies	2,176.67
Flags	40.25
Other expenses of instruction	2,154.36

OPERATION AND MAINTENANCE

Janitor service	\$5,037.25
Fuel	6,040.35
Water, light, janitors' supplies	1,691.08
Minor repairs and expenses	4,209.42

AUXILIARY AGENCIES AND SPECIAL ACTIVITIES

Medical inspection and health supervision	\$3,557.38
Transportation of pupils	2,660.20
Other special activities	2,411.65

FIXED CHARGES

Insurance	\$3,044.66
-----------	------------

OUTLAY FOR CONSTRUCTION AND EQUIPMENT

New equipment	\$1,307.70
---------------	------------

DEBT, INTEREST AND OTHER CHARGES

Payments of principal of debt	\$11,250.00
Payments of interest	10,771.88
State tax (\$2.00 per capita)	2,980.00

Deducting the payments for principal, interest, and per capita tax, the total current expenditure was \$114,983.00. Of every dollar of this total there was spent for

Administration	\$.041
Teachers	.61
Evening School	.015
Books and Supplies	.051
Other expenses of instruction	.019
Janitors	.044
Fuel	.053
Water, light, and janitors' supplies	.015

--------------	--------------------

Five members of last year's teaching staff severed their connection with the school last June: Miss Ames accepted a teaching position in Porto Rico and Mr. Dumont one in New Britain; Mr. Chadbourne and Mr. Clark accepted business positions; while Mr. Downs returned to Tufts College as graduate manager of athletics. Miss Mary Fairman, a graduate of Rhode Island College of Education, was elected assistant in English; Richard G. Wood, a graduate of Dartmouth with post-graduate study at Harvard, succeeded Mr. Chadbourne in

History. Mr. Royce, for a number of years in charge of the Apprentice Department at the B. & M. shops at Concord, and Mr. Olsen, who had been connected with the cabinet department at the Laconia Car Company, were elected instructors in the Mechanic Arts Department. Harold T. Fernald, a resident of Laconia and a graduate of New Hampshire University, succeeded Mr. Downs. Miss Knight, a graduate of the Physical Education Department of New Haven Normal School, was added to the teaching staff as instructor in physical education for girls and assistant in domestic science.

Registration in the High School for this year is as follows:

Seventh Grade—Total enrolment	141	membership	now	123
Eight Grade—Total enrolment	115	membership	now	101
Senior High School—Total enrolment	338	membership	now	308

The total enrolment in the High School is about the same as it was last year at this time. There are more pupils in the Seventh and Eighth Grades, while the enrolment in the Senior High School is approximately 50 less than it was last year. A large number of boys and girls did not return to school in the fall and 30 have withdrawn since the opening of school.

It is to be regretted that the mortality among our High School pupils is so great. Of course several withdraw from school because of removal from Laconia but altogether too many leave because of lack of interest in securing an education. Parents are asked to co-operate with the teachers in "selling" the need of an education to the boys and girls of the community.

Recently letters were sent to 100 business men of Laconia inviting them to inspect the building and the school work. Six men showed their interest and expressed themselves as well repair for

their efforts. The result during American Education Week was practically the same.

Delegations from several towns have inspected the building and many inquiries have been received from towns where the erection of a new building is contemplated.

Last fall a model of the High School building was shown as a part of the New Hampshire exhibit at Springfield, Mass. Later the model was shown in Concord and Manchester.

Our graduates are entering post-secondary institutions in increasing numbers and most of them are bringing credit to themselves and to the High School by the grade of work they are doing.

Interest in debating has grown in the last few years. Last year under the skilful direction of Mr. Freedman our teams won the Walter M. Parker Cup at the University of New Hampshire.

Work in all departments has improved over last year. Our teachers are faithful in their efforts for the welfare of our boys and girls and deserve the co-operation and support of parents and citizens.

ELEMENTARY GRADES

The teachers in the different grades together with their total enrolment and the membership at the present time are as follows:

TEACHERS

ACADEMY STREET

	Grade	En'm't	M'b's'p
Mary L. Chase, 348 Main St.	I	29	27
Harriet K. Dodge, 47 Pine St.	I	29	26

THE WEIRS SCHOOL

Gertrude M. George, 192 Elm Street, Lakeport.

SPECIAL TEACHERS

Fred H. Osgood, <i>Music</i>	45 Academy Street
Ruth K. Walstrom, <i>Art</i>	445 Main Street

At the Academy Street School Miss Dodge and Miss Ramsay, graduates of Keene Normal School, succeeded Miss Pierce, who was married, and Mrs. Murray, who resigned to accept a position in Berlin. Repairs were made on this building last summer so that it is now cleaner and in better condition than it has been for a long time.

Owing to the state of the finances and to the fact that a smaller enrolment was anticipated it was decided to discontinue one school at Batchelder Street.

Relief for the overcrowded conditions in Grades Three and Four at Academy Street and Grade Five and Six at Batchelder Street should be provided another year.

No repairs at the Batchelder Street building will be necessary this year.

The same teachers at Harvard Street returned this year. Interest and school spirit here are especially good. During American Education Week there were nearly 300 visitors to these schools. The physical condition of the building is good.

At Gilford Avenue Miss Alice Abbott, a graduate of Salem Normal School, took the place of Mrs. Ephlin, who resigned to return to her home in Texas. The number in each of these rooms is too large and some change must be made another year. Another room can be opened here or a part of the children can be sent to Academy Street and to Batchelder Street. Both the exterior and the interior of this building should be painted another summer.

The only repairs needed at the Mechanic Street building is a new fence on the west side of the school lot. Miss Edna Gouin succeeded Miss Margaret Davis in grade one and two. Miss Gouin is a Plymouth graduate. There was an enthusiastic gathering of parents at this building one evening in the Fall. Gatherings of this kind during the year

when questions of importance could be discussed would be of great benefit to the school and the community.

Similar repairs were made at the Washington Street building and Mechanic Street building last summer. At this building a program dealing with problems of interest to the public was given before a large audience during Education Week. Teachers appreciate attendance at such meetings but need the co-operation of parents at all times. Miss Baldwin accepted a position in Massachusetts and her place was taken by Miss Ruth N. Kelley, a graduate of Keene Normal School.

Mrs. George's family at The Weirs numbers only 12 now. However, Mrs. George and her boys and girls are as happy and enthusiastic as ever. There is always a splendid spirit here. This building should be painted this year and it may have to be shingled.

New textbooks in Arithmetic, English, Spelling, and Geography were introduced in the Fall. These books together with considerable new reading material have aroused interest among the pupils in their work.

EVENING SCHOOL

Miss Blanche Weymouth, who has been Director of Americanization for several years, gave up the work in order that she might spend the winter season in Florida. Mr. Royce, in machine shop practice, is the only new teacher. The enrolment has been 175 this year. The interest on the whole has been good and the work of the classes has been satisfactory.

HEALTH

Miss Eva Nelson, who has had considerable

training and experience in public health work, succeeded Miss Heney upon her marriage. The work has been carried along on similar lines to that of former years, although the epidemic this winter had broken into the routine work of the nurse to a considerable degree. A good number of corrections have been made along different lines. The great need now is a dental clinic.

MUSIC AND ART

Many favorable comments are heard upon the drawing work done by our pupils. Often a boy or girl with a highly developed artistic temperament is found and an attempt is made to encourage the development of this quality.

Choral work and instrumental work among our High School pupils is not developed as fully as possible. Provision should be made for these features in the program of the school.

RECOMMENDATIONS

I would repeat the need of special classes for those who for various reasons are over-age for their grade.

One or two kindergarten classes would be desirable although other needs are more urgent.

Greater co-operation between the homes and the schools would be of great benefit to the schools. This might come about through organization of parent-teacher associations.

There are in each graduating class a few boys and girls who are unable to continue their education for financial reasons. The Woman's Clubs of Laconia and Lakeport are doing a splendid work with their scholarship funds. Here is an opportunity for individuals and for other organizations to render assistance to deserving boys and girls.

Full benefit of the school plant cannot be secured until the land in the rear of the High School building has been developed into a playground with provision for the athletic contests of the school.

A motion picture machine would be a welcome addition to the equipment of the school. Here is an opportunity for some one to provide proper entertainment and educational advantages for the school.

CONCLUSION

I have endeavored to present conditions as they exist in our school in a brief form. I believe that the new system of organization will bring good results, as it has done in many places throughout the United States. Our teachers are faithful in the performance of their duties and are becoming better qualified by attendance at summer schools and by extension work.

Constructive criticism and suggestions for the improvement of the schools are always welcome. The citizens of Laconia are urged to visit the schools and to inform themselves of conditions as they really exist so that their judgment may be unbiased and unprejudiced.

Our boys and girls and our teachers deserve the loyal support of this entire community. By this means only can we build better for the future.

We are all very grateful to the members of the School Board for their efforts in behalf of the schools.

Respectfully submitted,

JOHN S. GILMAN,

Superintendent.

FIRE DEPARTMENT

REPORT OF CHIEF ENGINEER

To the Honorable Mayor and City Council:

I have the honor of submitting for your consideration the annual report of the condition and operation of the Fire Department for the year ending, February 15, 1925.

During the past year the Fire Department responded to fifty-six box alarms and one hundred and sixty-seven still alarms.

The following improvements have been made in our Fire Alarm System:

One four-circuit repeater complete cost \$1,500.00.

Four miles No. 8 fire alarm wire installed by Laconia Gas & Electric Co.

Two automatic fire boxes; one at Lakeport station and one at Laconia station. Cost \$400.00 each.

Eighty F. I. P. storage battery cells; one protective board or lightning arrester.

Changing the fire alarm system on the outside to four circuits.

Installing six fire alarm boxes at a cost of \$150.00 each.

The total cost amounting to \$3,700.00.

There is an urgent need of more fire alarm boxes throughout the city, and I would recommend that a few be installed each year. His Honor, the Mayor, and Council have been interested in this very important system. They have voted to install two fire

alarm boxes at The Weirs, running two lines of wires five miles, at a cost of approximately \$1,900.00.

I wish to express my appreciation to Mr. Brockington and his assistant, Mr. Fisher, for their interest in our fire alarm system.

A. W. SPRING,

Chief Fire Department.

RECOMMENDATIONS

I would respectfully recommend the purchase of a suitable ladder truck, motor driven.

The Lakeport Fire Station should be made wider, and for better accomodation, for fire service, there should be one more door, covering space for a ladder truck.

Several fire alarm boxes should be installed on various streets, this year; one box near Cross Street and Whipple Avenue; one box near Edwards Street and Province Street; one box on Warren Street; one box at the corner of Sheridan and Appleton Streets; one box near the Gas Works on Messer Street; one fire box at Laconia High School yard, and one box on Academy and Beech Streets.

Pneumatic tires should be mounted on the motor truck at the Central Station; also one thousand feet of fire hose must be purchased this year.

INVENTORY OF THE FIRE DEPARTMENT

Land and buildings	\$30,000.00
Two compressed air fire alarm systems	3,500.00
Fifty-one fire alarm boxes @ \$150-00	7,650.00
A six-circuit fire alarm station	4,500.00
Storage batteries	2,000.00
Electrical apparatus complete	1,000.00

Two American Lafrance motor driven chemicals and pumpers, Type No. 75 and Type No. 39	14,000.00
One Ford truck with chemical and hose	600.00
Two combination chemical hose wagons (Horse drawn)	1,200.00
One city service ladder truck	1,500.00
One small ladder truck	300.00
Sixty-nine hundred feet of 2½ in. fire hose	6,000.00
Six horses	1,400.00
Three sets harness	300.00
One Amoskeag steam fire engine in good working condition. Capacity of pump- ing 400 gallons per minute	3,000.00
Fire fighting tools and equipment	3,600.00
Two hose sleds	300.00
One supply wagon	75.00
Two Eastman deluge sets	150.00

Dec. 13, chimney fire, J. Wellman, 639 Union Avenue.

Dec. 14, chimney fire, J. Lamont, 635 Union Avenue.

Dec. 21, chimney fire, M. Barfells, 34 Park Street.

Respectfully submitted,

ARTHUR W. SPRING,

Chief Engineer.

TWENTY-FOURTH ANNUAL REPORT OF THE BOARD OF PUBLIC WORKS

Laconia, N. H., Feb. 13, 1925.

To the Honorable Mayor and City Council:

We would respectfully submit for your consideration, the twenty-fourth annual report of the Departments under our supervision, including a transcript of the detailed reports and recommendations of the City Engineer, Street Commissioner and Superintendent of Sewers.

The Board acknowledges co-operation of your honorable body in matters of appropriations and advice during the year, and is pleased to report that substantially all work authorized and provided for, has been accomplished, with the exception of the recovering of concrete sidewalks, which the contractor failed to complete.

Gilford Avenue, from Union Avenue to Highland Street, and Elm Street from Fairmount to School Street have been surfaced with bituminous macadam, and also about a quarter mile on South Main Street, from Grant southeasterly, the latter being constructed in conjunction with the State, being a part of the Rocky Pond Road, so called, the trunk line highway leading from Laconia to Concord, via Belmont.

Granite block paving on Water Street, has been continued to the Railroad Crossing. New surface drains, sidewalks, etc., built during the year, are shown in detail in the report of the Street Commissioner.

A very persistent public demand has arisen of late, for more snow removal, and the ploughing out of our principal thoroughfares, so as to permit the use of motor vehicles during the winter season.

In recognition of this demand, we took the matter up with your body at the January meeting, with the result that it was decided to authorize the purchase of suitable equipment to clear the streets.

You committee on Roads and Bridges, together with the Board, decided upon a Sargent Plow, driven by a Best, 60, Tractor, as a satisfactory equipment, and after satisfying themselves by witnessing actual demonstrations of its work upon the local roads and streets, decided to purchase. It is hoped and expected that the benefits derived from its use will justify its cost, especially in the matter of the additional fire protection afforded to certain sections, otherwise inaccessible during several months of the year, so far as use of our motorized fire apparatus is concerned.

In the matter of recommendations for new work for the ensuing year, we would call your attention to Fair Street Bridge. The Street Commissioner reports this structure in very poor condition and we are of the opinion that a two-span steel structure having a concrete floor and supported by a center pier, should be erected this year.

According to the provisions of House Bill No. 90, now pending in the Legislature, there will become available from the State, \$12,500.00 during 1925 and 1926, for the continuation of bituminous macadam construction on the highway from the Mathes place on North Main Street to the New Hampshire State School, providing a like amount is appropriated by the City. If this bill is enacted into law, we would recommend that the necessary appropriation be made by the City, that is, \$6,250.00 for each year.

It is expected that Trunk Line Construction Funds up to \$5,000.00 from the State, will also be available to continue construction on the Rocky Pond Road, so called, provided that the City qualifies with a like appropriation, and we recommend that this proposition be provided for.

In addition to the above, we would suggest that some macadam work within the residential section of the City be authorized and a deserving list of streets needing early construction is offered in the report of the Street Commissioner.

It is our belief, that the extension of the Sanitary Sewer system is vitally important, and we hope appropriations may be granted to do some of this work the coming season.

The report of Prof. Fletcher, of the State Board of Health, to the Mayor, relating to sanitary conditions at the Weirs, is printed herewith, and we earnestly recommend that you give this matter most serious consideration, for in our opinion, the time has come, for some affirmative action.

We endorse the Commissioner's suggestions that surface drains are badly needed on Walker, Endicott, School, North, Sheridan and Belvidere Streets.

We recommend the following general appropriations:

Bridge repairs	\$ 1,500.00
Cleaning streets	5,500.00
Cleaning catch basins	1,500.00
Collection ashes and waste	7,000.00
Cutting trees, brush, grass, etc.	800.00
Drain repairs and maintenance	1,800.00
Insurance	500.00
Maintenance of macadam	7,000.00
Sanding sidewalks	650.00
Recovering sidewalks	2,500.00

Sprinklin and oiling	5,000.00	
Purchase of equipment	4,000.00	
Winter expenses	15,000.00	
General repairs and maintenance	15,000.00	
		\$67,750.00
City Engineering	\$2,000.00	
Sewer maintenance	3,000.00	
State Aid maintenance	100.00	
Trunk Line maintenance	3,000.00	
		\$75,850.00

HARRY L. SMITH,
J. HENRY STORY,
L. K. PERLEY,

Board of Public Works.

REPORT OF THE STREET, SEWER AND ENGINEERING DEPARTMENTS

To the Board of Public Works:

Gentlemen:

The following is presented as the report of the Public Works Departments for the year ending Feb. 15th, 1925.

Organization

Supt. of Streets, Sewers and City Engineer

CHARLES A. FRENCH

1st Asst. Engineer—Clerk, John M. Eldredge.

Assistant, Arnold J. O'Mara.

Foremen Street Department

William J. Greelay

Nelson Dione

Division No. 1

Charles H. Swain

Division No. 3

Archilles Parent

Foreman Sewer Department

The amount expended for the year 1924-25 is \$101,786.04 and the same is itemized under the following headings:

1	Bridges		
	Weirs Channel	\$841.52	
	Miscellaneous	250.00	\$1,091.52
2	Cleaning catch basins		1,551.34
3	Cleaning streets		5,353.89
4	City Engineering		1,976.50
5	Collection of ashes and waste		6,885.22
6	Cutting trees, brush, etc.		1,166.47

7	Drains		
	Gilbert Brook Improvement	7,527.33	
	Girard Street	434.69	
	Maintenance	1,322.99	9,285.01
8	Elm Street Improvement		4,620.65
9	Fair Street Improvement (materials)		832.50
10	Gilford Avenue Improvement		9,149.77
11	Holman Street Improvement		909.54
12	Insurance		445.75
13	Maintenance macadam		6,625.40
14	Marsh Hill culvert		2,283.36
15	North Main Street culvert		366.66
16	Purchase tools and equipment		884.45
17	Sanitary Sewers		
	North Main St. (materials)	707.50	
	Maintenance	3,152.95	3,860.45
18	Sidewalks		
	Jackson Street	\$629.84	
	Lakeside Avenue	1,974.24	
	Main Street and Canal Street	276.00	
	Union Avenue	1,691.10	
	Recovering	267.30	
	Sanding	696.39	5,534.87
19	Sprinkling and oiling		5,171.75
20	State Roads		
	Rocky Pond Road	5,408.74	
	State Aid maintenance	148.68	
	Trunk Line maintenance	5,447.46	11,004.88
21	Water Street Improvement		2,076.66
22	Winter expenses		11,089.62
23	General repairs and maintenance		9,619.78
Total			\$101,786.04

BRIDGES

The following table gives information in regard to the condition of all city bridges.

No.	Name	Span	Material	Condition	Location
1	Academy St.	15.5 feet	Concrete	Excellent	Durkee Brook
2	Church St.	150.0 "	Wood	Fair	Winn. River
3	Court St.	15.0 "	Concrete	Excellent	Durkee Brook
4	Davis Place	23.0 "	Concrete	Excellent	Jewett Brook
5	Elm St.	232.0 "	Concrete	Excellent	Winn. River
6	Fair St.	201.0 "	Wood	Very Poor	Winn. River
7	Garfield St.	10.0 "	Concrete	Excellent	Durkee Brook
8	Gold St.	145.0 "	Steel, Wood	Good	Winn. River (Foot bridge)
9	Highland St.	25.0 "	Concrete	Excellent	Jewett Brook

The three wooden bridges still remaining are in a poor condition and must be rebuilt or replaced with more permanent structures very soon. The Fair Street bridge is in the worst condition. The Church Street bridge, should the tracks of the street railway be removed, could be repaired so as to give several years more service before a new bridge is built. The Mill Street bridge is poorly located, the street is contracted more than one half its width by encroaching buildings and the east approach is on such a steep grade that it does not seem advisable for the city to build a permanent structure at this point. A bridge from Arch Street to Somes Court may be the solution of this problem.

The Wairs Channel bridge, when the rails of the car track are removed, can be repaired to give service for a while.

The bridge over the B. & M. R. R. on Endicott Street is inadequate and unsafe but is the property of the railroad and must be maintained by them according to a recent decision of the New Hampshire Supreme Court.

DRAINS

The Gilbert Brook improvement was continued from the west side of Main Street, across Main and Pine Streets in a reinforced concrete culvert, through private land to Cottage Street and from Cottage Street to Jolliette Street in a metal pipe. The existing culverts at Cottage and Jolliette Streets were improved to correspond with the new structure. A balance of \$1,672.67 is available toward continuing this conduit to and across Dolloff Street. This extension would permit the construction of the drainage system for Baldwin, Lovell, Merrimac and Warren Streets through Dolloff Street to the improved waterway.

I wish to renew my recommendation for an appropriation for drains in Walker, Endicott, School, North, Sheridan and Belvidere Streets.

MAINTENANCE OF BITUMINOUS MACADAM

The cost of maintaining 103,203 sq. yds. of bituminous macadam built previous to 1924, exclusive of state roads was \$6,625.40, or six and four-tenths cents per sq. yd. which is above the yearly average. A considerable proportion of this cost is due to the poor condition of the tracks of the Laconia Street Railway in the streets where this type of pavement is in use.

PURCHASE OF TOOLS AND EQUIPMENT

Although an item of \$4,000 was included in the appropriation for this department for the purchase of tools and equipment, it was thought inadvisable to use this sum for that purpose in view of the reduction in the item for general repairs and maintenance which was made by the City Council.

The Federal 4-ton truck bought in the early spring of 1917 has reached the stage where repair

costs are excessive and I would recommend the exchange of this machine for lighter trucks.

It was found necessary to make extensive repairs to the 10-ton Buffalo-Pitts roller which has been in service since 1907.

This department is badly handicapped for garage room for the storage and repair of trucks and equipment.

SANITARY SEWERS

No appropriation was made for the construction of sanitary sewers with the exception of an amount to pay for some of the material for the proposed North Main Street sewer. There are several petitions asking for sewer extensions, but no funds were provided.

The State Board of Health have made a study of the problem of sewerage at the Weirs and have made a recommendation together with a partial estimate of cost, for a system for collection and disposal. (see appendices).

The City has purchased the land at Endicott Park, so called, for a site for a tank and disposal works.

It is probable that the cost of a complete sewage system at the Weirs would be in the vicinity of \$30,000 and I recommend that the City raise the required funds and construct the system this coming season.

The usual amount of maintenance was given the sewage system and many more Carolina Polars, causing damage to the sewers, were removed.

SIDEWALKS

Asphaltic sidewalks were built on Jackson Street, Lakeside Avenut at the Weirs, Church Street at the corner of Union Avenue, Union Avenue from Jewett Brook to High School lot.

Walks were regraded and surfaced in conjunc-

tion with street improvements on Gilford Avenue and Water Street. The sidewalk on Main and Canal Streets at the new Piscopo building was removed and resurfaced with Granolithic, the City paying less than half the cost of this improvement.

But little recovering of old sidewalks was accomplished owing to the absence of the contractor from the City.

PLUMBING

This department issued permits for and inspected 123 jobs of plumbing during the year.

STATE ROADS

Construction: A section of the Rocky Pond Road, so called, on South Main Street from Grant Street southerly was constructed of bituminous macadam at a total cost of \$5,408.94 one half of which amount was paid by the State of New Hampshire.

Maintenance: The usual maintenance work was done on the Daniel Webster Road and on North Main Street. In addition a reinforced concrete culvert was built on the Daniel Webster Road near Stark Street.

ENGINEERING

Surveys and estimates for various projects were made including the Rocky Pond Road, Sewer System at the Weirs. Streets were surveyed, plans and descriptions for street lay-outs were made and filed.

Surveys were made for the extension of the Gilbert Brook improvement and right of way or easements were obtained through private property.

GENERAL

All the work provided for by appropriations was completed with the exception of recovering sidewalks as heretofore noted.

But little new equipment was bought as explained in a previous paragraph but money should be provided for a change in motor trucks as our old four-ton Federal truck is practically worn out.

Funds should be provided to improve and resurface Messer Street, Fair Street, South Main Street from Providence to Grant Streets, Pine Street from Main to Baldwin Street and to continue Elm Street westerly.

Respectfully submitted,

CHAS. A. FRENCH,

City Engineer, Supt. of Streets and Sewers.

Hanover, N. H., Nov. 8, 1924.

Hon. C. H. Perkins,

Mayor of Laconia.

Dear Sir:

I have the honor to present the following report after due study of the problem of sewage disposal at The Weirs:

The inspection made on September 22d., with yourself, members of the Council, the City Engineer and Health Officers, by Dr. Howard (chemist and head of division of chemistry and sanitation, State Board of Health), Mr. A. H. Fletcher, Sanitary Engineer, and the writer, revealed to all concerned the outstanding features of the situation and an idea of the difficulties of the problem. One of these difficulties lies in the fact that, during seven or eight months of the year, there are probably less than 200 people to be served by any sewage disposal system; but during the other four or five months this resort for conventions and excursionists may have to accommodate crowds which have been estimated as high as 10,000 people.

Referring briefly to the existing conditions which have made remedial measures a necessity, we need only note that the raw sewage from a part of this district has been for some years discharged directly into the lake in plain view from the railroad, and the steamboat landing; that the discharges from the inadequate toilets in the railroad station dropped directly into the lake between high and low water levels; that there is little definite knowledge of the lines and grades of the sewerpipes that have been laid, and no system by which the sewerage can be delivered at a single suitable outfall; that the wastes from some dwellings, discharged into cesspools, or directly on to the ground, were creating nuisance

which gave great offense; and that the time had come for a careful investigation to discover some plan for a comprehensive system of disposal of the wastes of the entire district.

On October 9th and 10th the writer and Mr. A. H. Fletcher conferred with the City Engineer who furnished an old blue-print map of the street lay-out of the Weirs and allowed us to obtain from insurance maps the location and number of hotels, residences, cottages, buildings of the Veterans Association encampment, etc. He also gave us the aid of his surveying force by which sufficient profile-leveling was done on Lakeside Avenue and the Camp Ground to make it evident that an intercepting sewer laid in Lakeside Avenue from north to south, could be led into a septic tank located on the park space at Endicott Rock, the effluent from which could be discharged into the lake near the bridge. Right here it may be well to explain (what may be already understood) that ordinary domestic sewage, detained in a *tight* tank from 6 or 8 to 24 hours, undergoes a "digestion" which changes 40 to 60 per cent. of the solid constituents into gasses and water. The effluent is then nearly clear and inoffensive to sight and smell but yet contains about half of the original solid matter in a dissolved state, and may contain germs of disease, such as typhoid, etc., if any were in the sewage. This raised the question of chlorination of the effluent as a final precaution, and led to an investigation of practicable devices for applying chlorine to the effluent under the widely varying conditions of very small and very large volume of discharge. A discussion of the desirability, not to say necessity, for such precautionary treatment belongs properly to the separate report from Dr. Howard.

On October 28th, the writer, with Dr. Howard

and Mr. A. H. Fletcher, while en route to another objective, stopped at The Weirs to inspect particularly the vicinity of the railroad station and steamboat landing. The City Engineer happened to be there and gave opportunity to consider figures regarding the water supply and toilet facilities which he had already given us by mail in response to inquiry.

GENERAL PROPOSAL

From the figures and other information thus received and duly considered, Mr. A. H. Fletcher has drafted plan and profiles to indicate a possible sewerage system adapted to collect the sewage and deliver it into a tank where partial purification may be effected by natural process as before stated. In studying a plan and method for ultimate disposal of the sewage, the aim has been to adapt it to the limited and variable requirements of this outlying district of the city, by means which will be as simple and as little expensive as is consistent with the reasonable prescriptions of the science of sanitation. The drawings show that the main sewer on Lakeside Avenue, laid in a trench three and one-half to four feet deep, may have a grade nowhere less than 0.5 per cent. or 6 inches per 100 feet. Since house sewage generally has a temperature of about 50 degrees F. there is no danger of freezing under the conditions stated; provided always that the manholes have tight covers and that all surface water and rain water from roofs are rightly excluded. And, right here, it is presupposed that the proposal is for a pipe sewer laid with cemented joints to exclude ground water, so far as possible, and that the house plumbing is modern enough to be fairly fool-proof, so as not to admit garbage or rubbish or any hard material which could not pass through the trap of the bowl of a toilet closet.

It is also presupposed that this main sewer will be built in conformity with the standards of modern practice, with a manhole at each intersection by a branch sewer, and that the alinement between manholes will be straight, and established on a strictly uniform grade.

Also the understanding is that this report simply proposes or suggests the general features of the system, adapted to accomplish the end in view in the most direct way; and that the entire responsibility for the execution of the work will rest with the City Engineer and the authority under which he acts. All questions relating to the inclusion of branch sewers and *details* of the treatment of the Camp Ground problem, are here given only such attention as their relation to the general scheme demands. Ultimate decision on such questions must be given by the city authorities.

THE SEPTIC TANK

The grade of the main sewer shown on the profile drawing is determined by the necessity of having the inlet of the sewer into the tank at a height sufficient to allow the tank to be set entirely above the level of the surface of the lake. This is to avoid possible trouble from ground water in placing the concrete for the floor of the tank. The height from the foundation bed to the inlet is seven and one-half feet, including thickness of the floor. The tank may be set lower down and a slight increase in the grade of the sewer secured, if the risk of trouble from ground-water is accepted.

The determination of the size and proportions of the septic tank involved a careful inquiry into the conditions affecting the probable amount of sewage to be treated. The insurance maps represent about 200 buildings in the district, including dwellings,

stores, cottages, bungalows, and buildings in the Veterans' Encampment; also five buildings rated as hotels. Information from one of the older permanent residents was to the effect that an average of six persons for each dwelling would be a great overestimate. Allowing this, however, because of possible crowding in of visitors on occasions, we would have 1,200 persons under roof. The largest hotel is said to accommodate 300 when full, and the next smaller (Lakeside House) from 120 to 140. The other hotels, so called, would not average 50 persons each, or 150 more; total for the hotels, 580; but, to be liberal, say 600. This added to 1,200 gives 1,800 as the capacity of all the housing accommodations. Now, as to the transient crowd, coming and going during possibly 12 hours of the day, we are liable to overestimate the number as regards the demand they may make upon the toilet facilities. Of course they would not be allowed to invade the hotels to any great extent. The City Engineer notes 16 seats, 8 wash bowls and 11 urinals in the public comfort station, the Veterans H. Q. building and the Veterans new comfort station; and states that these seem to handle the situation very well. The steamboat wharf has no toilets and the R. R. station has quite scanty accommodations which are far from creditable. Making a guess of 7,000 transients the City Engineer thought that an average of five gallons of water used by each would be an overestimate. This would require 35,000 gallons daily; but it is difficult to see how 7,000 people could be accommodated by the number of fixtures just stated, during the daylight hours; and so we may assume that many visitors do not use the facilities provided. However we may adopt that number and consider that it covers an allowance for future contingencies.

For the residents and more permanent sojourn-

ers we may assume a daily use of 25 gallons each, for all purposes. This is based upon experimental meter observations made in dwelling houses in Hanover during one year, where payment is on a flat rate, the use of water being under no restriction. Reckoning on this basis:

	Gallons
1,800 persons at 25 gallons each require	37,000
7,000 transients at 5 gallons each require	35,000
	72,000

But the the regular, all-day demand may be reduced to three detention periods of eight hours each. Hence, on emergencies the 37,000 gallons, detained only 8 hours would require only one-third of this volume, or say 13,000

The allowance for transients, limited at most to twelve hours may be considered to traverse the tank during $1\frac{1}{2}$ periods, or 2-3 in one period: Say 25,000

Total during one period	38,000
-------------------------	--------------

A tank 48 feet long, 15 feet wide and 7 feet deep of water has a capacity of 48X15X7—5040 cubic feet. And this reduced to gallons is 37,800 gallons.

A consideration that the requirements for the transient visitors may be quite over-estimated lies in the fact that the principal consumption of water by them would be through use of the toilet and urinals. Besides the three sets already mentioned a fourth may be anticipated for the railroad station. As to the urinals:—if all parties were willing to meet the expense of automatic flushing, we may calculate the consumption of water as follows: If the service of one set required 8 gallons discharged every three minutes, that would be 160 gallons per

hour; and if the management should be so wasteful as to allow this through 24 hours, the water required would be 3840 gallons for one set and for four sets, 15,360 gallons per day. But if the cost of pumping water should lead to limiting this service to 12 hours the consumption for one set would be about 2,000 gallons, and for four sets about 8,000 gallons per day;—certainly not more than 10,000. Subtracting from the 35,000 allowed for the transients leave 25,000 gallons for all other possible uses, which is so unreasonably generous as not to be justified unless as a provision for contingencies and growth of the place;—which latter we are told is quite improbable.

Another aid to making a reasonable guess on the water consumption is to be had from records of the pumping station. The City Engineer states that these records are incomplete and unreliable, as there are no meters to afford definite figures. But he finds that on one day last August, during the dry time, the reservoir lowered five feet (55,000 gallons) in nine and one-half hours, from 12:30 A. M. to 10:00 A. M.—This is the time of the largest consumption during the day; and of this some unknown fraction would not reach the sewers,—such as what is used in garages and for lawn sprinkling, gardens, etc. If these diversions amount to 15 per cent. (8,250 gallons), the balance (say 47,000 gallons) is not too large a proportion of our *first total* (72,000), since nine and one-half hours is about two-thirds of the working day.

The drawing shows the large tank divided into two equal compartments by a longitudinal wall. The inlet to this double tank is so designed that,—by use of a simple board-stop,—one compartment may be entirely shut off during the long season of minimum flow of sewage. Joined to the large tank

is a smaller compartment designed to give a short second treatment. The overflow *from this* will pass into a smaller chamber where chlorination of the effluent may be effected. The tapering form of this division is given to increase the rate of flow as the cross-section becomes narrower, so as to facilitate the discharge into the outfall pipe.

CHLORINATION

The details regarding chlorination,—the argument, rate, limitation, apparatus, etc. are presented in Dr. Howard's report in conjunction with this. Here we refer to those features of the drawing which provide the housing and structural facilities for the application of the process. A partition with overflow-weir near the end of the tapering chamber separates a well where the process is effected. This is so proportioned that *the volume* of effluent, flowing through and out of it, is such that, at time of maximum flow, any given portion,—say ten gallons,—will be exposed to the action of the chlorine about 15 minutes. The capacity of this little chamber is 156 cubic feet equal to 1,170 gallons. The requirement for it is determined by the maximum flow through it in 8 hours, which we have set at 38,000 gallons. In one hour this would be 4,750 gallons and in 15 minutes 1,180 gallons, which agrees almost exactly with the capacity just stated.

The hut or cabin to contain the chlorinating apparatus suggested in the drawing may be of any convenient size and built of such materials and after such design as the City Engineer may prefer. While resting on the roof of the tank it has adequate support below, especially if a little reinforcement is put in the roof, and the concrete base or underpinning of the hut is poured at the same time with the roof of the tank below, and a few anchoring bolts placed at the junction.

THE CAMP GROUND

This section, cut off from the rest of the district by the railroad right-of-way, presents a distinct problem. An intercepting sewer to receive the drainage from all of the houses must follow nearly the margin of shore-line of the lake; but this is so nearly level, and the surface so little above the lake surface that any practicable grade for a sewer would quickly descend below water level, if continued in one direction through nearly the 1,500 feet of distance. The only solution, apparently, is to lay a sewer pipe from both ends toward a central point, into a shallow tank, and pump from that through a pipe laid on or just beneath bridge over the railroad track to a junction with the main sewer. Even so, such a sewer must be laid near or upon the ground surface in some places with, perhaps, a low mound for covering, where protection is needed. At the head of Simpson Avenue the trench might be about three feet deep, but at the foot of the slope it would be upon or near the surface. From this point is a practicable grade to a point just north of the center line of the auditorium, where the sewage might flow into a shallow tank of which the base would be near the lake level and the depth of sewage therein about four feet. From the northern boundary of the camp ground a sewer pipe started about a foot below the surface would have a satisfactory grade to the same tank. The houses on private property north of the camp ground could be served by this branch also. A septic tank has been built already behind the auditorium, and the effluent from this has given offense on that low ground. Whether that tank could be utilized in this proposed scheme is doubtful, as it is probably on too high a foundation. But, if it would allow only

three feet depth of sewage below the inlets of the branches just described, it would serve as a sump or suction-well for the pump which would lift or force the sewage into the main sewer on Lakeside Avenue. The treatment of the camp ground is so involved with relations of the City authorities to the owners of the property, that the details of execution of this proposal must be left with the City Engineer who is familiar with all the factors which would affect the practicability of the project.

THE RAILROAD STATION

The toilets in this station are not up to date;—so far from it that there is still retained on the women's side an old-fashioned (colonial!) privy directly over the water edge (Oct. 28) of the lake. Since hundreds, not to say thousands of people alight here daily, during the summer season, from trains and steamboats, it seems obvious that the R. R. Co. owes it to the travelling public which throngs the Station to provide toilet accommodations at least as good and as sufficient as the modern fixtures which it provides at other stations. The notorious tendency of thoughtless and malicious people to misuse and abuse such facilities for the public comfort should not be worse here than elsewhere.—It is evident at a glance that a sewer pipe from this station can be laid beneath the railroad tracks so as to make a short and direct connection with the sewer on Lakeside Avenue.

SEPTIC TANKS OF FAMILY SIZE

On one of the hillside streets we found that a family tank had been built (underground) close to the residence but almost if not quite beyond the street limit; and that effluent from this in a choked surface ditch had caused much offense in the neigh-

borhood, especially in hot and "muggy" weather. Evidently in such a crowded section, where the house-lots are very small, and the ground material is hard clay or clay hardpan, as it is here, individual septic tanks cannot be successfully used. Higher up on the hill, where the houses are scattered, in large land plots, the family tank may well be adopted because the effluent may be directed into stone-filled pits and trenches, or other means taken to promote absorption without too much exposure to the surface. Surely there is imperative need in each of these crowded side streets for a lateral sewer to provide effective house drainage for all buildings.

Indeed the large estimate of sewage to be treated presupposes collection of the sewage from all the sources in this district, eventually, through a completed system of lateral and auxiliary sewers.

OVERSIGHT AND MAINTENANCE

This report was nearly completed when the destructive fire at The Weirs occurred. If rebuilding is done, as announced in the newspapers, the essential features of this project will not be affected, since it is concerned chiefly with the trunk line,—while modifications of the plan, if any, would relate only to branch lines. In any case modifications would be made under direction of the City Engineer.

It is taken for granted that whatever is done will be strictly in accordance with the principles and cautions set forth in the N. H. Bulletin on the septic tank, edition of 1924, which has been widely distributed and a copy of which the City Engineer has in hand. However, a copy is attached to this report to serve as general specifications so far as appropriate for this case. The importance of intelligent oversight and care of the works, after completion, to insure effective operation, is too obvious to need statement.

COST OF PROJECT

The cost of such a work must be figured ultimately at the City Engineer's office, where all local conditions as to cost of labor, cost of materials, etc. are known. This report presents merely the bill of materials, possible amount of excavation, etc., sufficient for figuring an approximate estimate, when the unit items are determined.* These figures are given on one sheet of the drawings.

Respectfully submitted,

ROBERT FLETCHER,

Consulting Engineer.

*In Mr. A. H. Fletcher's report an attempt is made to give a tentative estimate based upon recent experience in work of similar character.

Concord, N. H., November 14, 1924.

Professor Robert Fletcher, C. E.

Hanover,

New Hampshire.

Dear Professor Fletcher:

You have requested me to furnish a statement discussing the chlorination feature, in connection with the proposal you are preparing for submission to the City of Laconia in regard to sewage disposal at The Weirs.

As you are of course aware, there is nothing new or novel about this kind of treatment. The first one of these in this state was in fact installed at Laconia as long ago as 1912, very largely for the purpose of furnishing a safeguard to the water supply against this particular sewage discharge, and there are now in operation in New Hampshire some two dozen installations.

A second local installation is that at the State School for Feeble-Minded, for treating the Opechee Lake supply. Ten miles south the city of Franklin has two installations on its water supply. At present there are two equipments in use for sewage disinfection, one at Spofford Lake, near Keene, the other at Newmarket as employed by the Newmarket Housing Corporation. The first is a summer affair used in connection with the discharge from one of the hotels. That at Newmarket has for a number of years been in very successful use the year around for disinfecting tank effluent prior to discharge into the river.

Sewage disinfection by chlorine is a process at present very commonly employed. It may be interesting to know that the largest plant of this kind now in operation is that for treating the sewage of Cleveland prior to discharge into Lake Erie, this plant alone utilizing six and one-half tons of chlorine every twenty-four hours. The propriety of this process as applied to the effluent from a septic tank is based upon the fact that the elements in sewage which cause disease, viz., the bacteria, are not greatly reduced as a result of septic action. The latter is essentially a process of digestion whereby the solid matters are decomposed and large gasified, the effluent thus unburdened of a large part of the original dissolved and suspended matter, being much better fitted for soil percolation. It therefore also means a large reduction in the amount of waste matter as discharged into a stream or pond, where this method of disposal is followed. The essential point in this connection is that disease germs are still likely to be present in this effluent, and it is known that the number of coli, or sewage bacteria, at this point is still very great.

Coming now to the arguments why the treatment

at The Weirs should include chlorination, four such may be advanced. These are:

(1) This discharge goes into Lake Paugus, from which the city draws its water supply. Admitting that this lake represents a large volume of water, that there is very large dilution, and that there are other pollutive conditions on this lake, the argument holds good nevertheless. The most dangerous contamination and by far the most extensive single item is The Weirs sewage, and it is entirely within the recognized possibilities for organisms of infection to survive the travel from The Weirs channel to the intake pipe of the water works. Furthermore, because there are other conditions on Lake Paugus which are also a menace is no excuse for failing to take proper action at The Weirs. Clean up the arch offender and the others can then the better be handled in due course, by such methods or in such ways as may seem proper.

(2) Because of the location close to the main highway, the fame and importance of The Weirs as a resort and the fact that much of the time during the summer the sewage discharge is of very considerable volume and into a point very close to which a considerable number of people are congregated.

(3) The fact that The Weirs sewage is by far the largest discharge of this kind now entering Lake Winnepesaukee and, for anything anywhere approaching its size, may be said to be practically the only one at present not involving some form of treatment,—it therefore being important as a valuable object lesson that whatever action may be taken here shall be along modern lines recognized as proper.

(4) The fact that as compared to the entire installation the cost of the disinfection feature consti-

tutes a relatively rather insignificant item, while the operating cost would be small.

There are two types of installations to be considered for such a purpose, (1) the so-called "solution feed," such as is now in use at the water works and which requires that water under pressure be available, and (2) the "dry feed," which involves introduction of the dry gas direct into the treatment well through a diffusing devise. Either should work satisfactorily; the latter has the advantage of being somewhat simpler. In either case, the ordinary or smaller types of machines will deliver a maximum of 10 to 12 pounds chlorine per 24 hours, or a *proportionately* smaller amount for lesser intervals. For a larger delivery rate it would be necessary to add an injector, with water supply then for either type.

However, it is clear that the twelve-pound maximum would be ample for The Weirs case. The dosage rate is from 5 to 15 parts per million, depending upon the character of the sewage and the degree of disinfection desired. In this case it is considered that ten parts would be ample, this being equivalent to ten pounds per 120,000 gallons. Professor Fletcher has estimated that based upon an eight-hour period of most active discharge, the maximum flow in all except perhaps the most extraordinary situations would hardly exceed 38,000 gallons and of course for most of the days during the summer would be substantially less than this. Allowing 120,000 gallons for the maximum 24-hour capacity of 12 pounds, this would mean 40,000 gallons capable of being handled by such machine at this rate during the 8-hour period, which would be ample.

Usually a 15-minute treatment or detention period is allowed. The chlorine chamber designed by

Professor Fletcher has a capacity of 1,170 gallons. With a maximum flow of 38,000 gallons per eight hours this would correspond to 1,190 gallons per 15 minutes, through this chamber. Obviously much of the time, especially during the night, there would be overdosage but this is not a matter of any consequence, the only consideration being gas wastage and this would not be a large item. It should be feasible, if desired, to have some responsible person cut the feed down to say one-half at 6:00 P. M., opening the valve again the next morning.

Incidentally it may be stated that there is no danger involved from action of the chlorine upon the concrete. As to the cost (exclusive of housing) this would be around five hundred dollars. The price of the gas arose during the war to 15 cents but it is understood that at present it sells for about 10 cents. As there would be no occasion for chlorination from say November 1st to May 1st, it is obvious that the cost of the chemical would be no great item.

It may be well to emphasize at this point that while the amount of time and attention required for oversight of this treatment is next to nothing, yet it is absolutely essential that a *certain amount* of regular attention be given to such an equipment by some intelligent responsible person,—otherwise any idea of utilizing such a device may as well be dismissed at once. In the comparatively few instances where chlorinators have not worked satisfactorily on water supplies this has invariably been due to neglectful, careless or grossly ignorant handling, usually on the part of some irresponsible person—the sort of person likely to fail to appreciate that any sort of mechanical device, no matter how simple, must have at least some intelligent care and

attention. The same remark of course applies as well to the septic tank.

Very truly yours,

CHARLES D. HOWARD,
Chief of Division.

Concord, N. H., Nov. 18, 1924.

REPORT OF STATE SANITARY ENGINEER DISCUSSING BRIEFLY
THE PLAN AND PROFILE MAP USED IN THE STUDY
AND SUGGESTED DESIGN OF A WEIRS SEWAGE
DISPOSAL SYSTEM

The plan and profile sheet enclosed as a part of President Robert Fletcher's report was made with the aid of an old blue print map which the City Engineer furnished us with in addition to leveling notes made by a survey party from his office. The plan shows the general location of the main line along Lakeside Avenue with the treatment plant and outfall pipe; also, the camp ground line along the lake shore and possible location of tank and pump outfit.

The final grade of the line from the proposed manhole at New Hampshire Avenue to the tank is shown on the profile from an elevation of four feet below the surface grade at New Hampshire Avenue to an elevation of seven feet above the inside bottom of the first tank.

Assuming values of:

$$n = .015 \text{ (usual friction co-efficient for vitrified pipe).}$$

$$\left. \begin{array}{l} \text{Max. flow of sewage plus ground} \\ \text{water leakage.} \end{array} \right\} = 0.6 \text{ cubic feet per second}$$

$$\text{Velocity} = 2 \text{ feet per second}$$

it would require corresponding values of:

Size of pipe 8 inches.

Slope of sewer 0.6 of a foot per 100 feet.

However, due to the resultant 10 feet or more cut at the deepest points and the difficult digging that is likely to be encountered and also to the fact that the tanks should be kept above water level if possible, this grade has necessarily been flattened and the velocity will be correspondingly less. Therefore in suggesting this final line it was found that the critical elevation determining the grade was the lowest possible elevation for the entrance of sewage into the first septic tank. It seems quite important to obtain the best grade possible to secure a scouring velocity, thus minimizing the danger of clogging up the line. The off season flow will be so small that the velocity of flow will be very slow and any slight increase in slope will help to prevent deposits in the sewer.

I have attempted to estimate very roughly the cost of a part of the project, namely that part exclusive of the camp ground, because it presents so many problems that require working out.

TENTATIVE ESTIMATE OF COST

Lakeside Avenue sewer line:

3,150 ft. long at \$1.40 per ft.	\$4,400.00	
11 manholes at \$50.00 per	550.00	
		\$4,950.00

(For Lakeside Avenue I figured an 8-inch sewer as adequate with possibly using a 10-inch from Cavalry Avenue to the outlet.)

Laterals (from hillside)—(which may be more or less according to decision as to immediate needs):

3,300 ft. (8-inch pipe) at		
\$1.25 per foot	\$4,125.00	
6 manholes at \$50.00 per	300.00	
		4,425.00

(For all laterals I assume 8-inch pipe throughout.)

Treatment plant:

Septic tanks		
Chlorinating chamber		
116 yds. concrete at \$24.00	\$2,900.00	
300 yds. excavation at \$1.50	450.00	
Chlorinator	500.00	
House	100.00	
		3,950.00

Aggregate total	\$13,325.00
Contingencies 10 per cent.	1,332.50
	\$14,657.50

A tentative estimate of \$15,000.00 subject to such modification as the City Engineer with his knowledge of local conditions is able to make.

ALFRED H. FLETCHER,

Sanitary Engineer.

POLICE DEPARTMENT

REPORT OF POLICE COMMISSION

To the Honorable Mayor and City Council:

Werespectfully submit herewith the report of
the City Marshall for the year ending Jan. 31, 1925.

ELMER S. TILTON,

RUFUS P. DOW,

JOHN M. GUAY,

Police Commission.

REPORT OF CITY MARSHAL

For the Year Ending January 31st, 1925.

ARRESTS

Males	279
Females	10
Whole number of arrests	289

CAUSES OF ARREST

Aggravated assault	7
Arrested for out-of-town officers	12
Arson	1
Assault	8
Assault with intent to kill	1
Breaking and entering and larceny	3
Cruelty to animals	1
Disorderly conduct	1
Disturbing the peace	65
Drunkenness, residents	53

Respectfully submitted,

CHARLES A. HARVELL,

City Marshal.

MUNICIPAL COURT

REPORT OF CLERK

To the Honorable Mayor and City Council:

Gentlemen: I herewith submit my tenth annual report as Clerk of the Municipal Court of Laconia.

The criminal cases brought before the Court and the disposal of the same as shown in detail by the report of the City Marshal. The cash receipts of the Court and the disposition of same summarize as follows:

Received from A. W. Dinsmoor, treasurer, fees and for copies to Superior Court,	\$ 79.50
Received from fines and costs,	3,851.53
Received from entry fees,	6.00
Received for executions, complaints and warrants and sale of writs,	7.64
	\$3,944.67

PAID AS FOLLOWS

Attorney's fees as counsel for minors, and complaint and warrants	\$113.00
New Hampshire Humane Society, fine and fees for cruelty to animals	37.38
State Fish and Game Dept. fines for violation of fish and game laws,	211.50
State Motor Vehicle Dept., fines for violation of motor vehicle laws,	587.80
Witness and Officer's fees	483.80
Fred A. Young, premium on Clerk's bond	10.00
Clarence S. Newell, Treas., cash	2,501.19
	\$3,944.67

REPORT OF CITY SOLICITOR

January 21, 1925.

To the Honorable Mayor and City Council:

At this time I beg to submit the report of the Law Department of the City of Laconia for the past year. Many matters of importance have been submitted to the Law Department by the various Departments of the City all of which have received my careful and diligent attention. No litigation in the Superior Court has appeared during the last year although several matters are pending. Recently an Equity proceeding was instigated by the City to preserve the three elm trees on Main Street opposite property owned by the St. Jean Baptiste Society and an injunction has been ordered until the title in the trees can be decided. Various ordinances have been drafted and legal documents drawn and all matters submitted have received careful consideration and attention.

Respectfully submitted,

THEO STEPHEN JEWETT,

City Solicitor.

LACONIA HOSPITAL

GENERAL REPORT

For the Year Ending December 31, 1924.

The statistical report of the Laconia Hospital for the year 1924, reveals a very amazing and marked increase over the report of 1923, in fact, the increase has been very nearly 50 per cent. There can be no question now as to whether or not we needed the new addition, and even this early, we are handicapped in supplying ward beds.

I think a few figures of comparison will show very clearly what our institution has done toward enlarging and broadening its service.

Admittances in	1923 - 748	1924 - 1,055
Number of days service given	1923 - 8862	1924 - 11,693
Obstetrical cases	1923 - 92	1924 - 141
Largest number of pa- tients any one day	1923 - 42	1924 - 53
Number of operations	1923 - 493	1924 - 649
Number of X-Rays	1923 - 417	1924 - 842
Number of out patients	1923 - 461	1924 - 753

Each department of the hospital is very well equipped and gives access to excellent work, although we are constantly finding deficiencies that must be supplied in the near future to further our development.

The obstetrical department, now a separate part

of the hospital, and managed under capable heads, both day and night, has grown a great deal. It is the splendid equipment in this department, furnished by the Baby Band and the Alumni, that has made it possible for the obstetrical work to increase.

The figures showing the number of operations, averaging better than two a day, means that both operating rooms have been kept very busy. The operating room supervisor has very capably handled this work, and has made possible the success of this department. In speaking of our surgical work, I must mention the ever increasing popularity of the Gas Oxygen outfit, given to the Hospital by the Curtain Band. The dread of anesthesia has been greatly reduced by the use of this machine.

The laboratory work at the Hospital has met with great success, and we are much better able to follow up and diagnose cases by the work, so effectively done there by one of our local physicians.

The X-Ray work has increased tremendously, and much new technique has been accomplished this year. The graduate nurse in charge of the X-Ray Department, having had special instructions for several weeks at the Massachusetts General Hospital, has enlarged very much on the work done in the previous years.

I feel that one great step taken forward in 1924 is becoming standardized by the American College of Surgeons. Great credit is due the physicians for this recognition, because their efforts have aided us greatly. This means that now the Laconia Hospital is rated with the best in the country.

At present, there are 19 pupil nurses in the training school. Graduating exercises were held in the High School Auditorium in May, when three nurses received their diplomas. The Training School has met the requirements of the State the past year.

Great credit is due all members of the faculty for the successful management of this great part of the Hospital.

The ever ready support of the Hospital Aid has been as constant during 1924 as for many years in the past. They have generously given of money, strength, time and labor. One item of special interest given by them recently is two wheel chairs, which were needed greatly.

The various bands have also contributed most freely, and have kept the hospital needs well supplied.

This report could not be completed without my thanks and appreciation to the Board of Trustees for their support through the past year.

Respectfully submitted,

MILDRED A. STEVENS, R. N.

FOREST FIRE WARDEN

Mr. Arthur W. Spring,
Forest Fire Warden,
Laconia, N. H.

Dear Mr. Spring:

In reappointing you for the year 1925, it is a pleasure to state that forest fire protection in New Hampshire improves with each succeeding year and that we can well feel gratified at this showing. It is not proposed to show here just how it continues to improve as that is a function more proper for the departmental News Letter. I do want you to know however, that this reappointment is not a perfunctory matter but a recognition of your good work which is appreciated.

This year's reappointment is in the form of a handy identification card which can be carried on the person at all times without inconvenience. In the past, instances have come up when a warden's authority to perform certain duties has been questioned and this card on presentation should tend to eliminate all such occurrences. This does not mean that the badge with which you are furnished need not be worn. On the contrary, the purpose of this additional identification is not served unless backed up by a warden's badge of authority.

In looking back to consider the good results in some lines of our work during the past year, one characteristic of the manner in which it was performed seems much important. Taking roadside

slash disposal as an example, that is a matter which has required little attention from this office. While this is due in part to less operating by the lumbermen, I feel that the manner in which the wardens have handled violations of the law is largely responsible for this fine condition. Lumbermen, if tactfully approached, like to be told of violations by the warden himself rather than to have the matter reported to us and made a state record. Spark arrester and other wood and timber operating requirements will also need less attention if tactfully handled when violations occur. This same manner of dealing with persons responsible for having started fires in violation of law will no doubt result in settling a great many more cases to the satisfaction of all concerned. In other words, tact and diplomacy in our work can play a large part and should be the watchword in the performance of our duties.

Another matter which I desire to call to the attention of the wardens particularly, is that of granting brush burning permits. Twelve per cent. (12) of all our fires during the past four years started from burning brush. A few fires were kindled without permits and suitable action has been taken. Most of the fires, however, were started with the permission of the warden. I believe that this high percentage of fires warrants our being more strict in the matter of granting permits and trust that you will have this in mind when asked for permits next year.

We are interested to know if you have received the News Letter and if you have any suggestions to make tending to make it more worthwhile as a medium of information to the wardens. To that end, a space has been set aside for your comments on the enclosed card. We hope that good ideas may be gleaned from your replies which will make the

Letter more fully serve its intended purpose. You will also request supplies for the coming year on this card and it should be returned as soon as possible in order to give us ample time in which to put up and mail such supplies before the opening of the fire season.

Wishing you a very happy new year, I am

Sincerely yours,

JOHN H. FOSTER,

State Forester.

REPORT OF TREE WARDEN

To the Honorable Mayor and City Council:

I have the honor of submitting for your consideration the condition of the shade trees on our city streets. During the past year we have planted 25 maple trees on various streets, some of them did not grow, but they will be replaced in the spring.

I do not advise planting new trees on streets, owing to lack of space. The older trees are now gradually dying, caused by the macadam sidewalks and Tarvia roads, there is no space left for moisture at the base of the trees.

During the coming year, there is much pruning to be done to maple trees, and I would suggest the removal of dead limbs on all trees.

Respectfully submitted,

ARTHUR W. SPRING,

Tree Warden.

OVERSEERS OF THE POOR

To the Honorable Mayor and City Council:

As we said last year in our report owing to the radical change in the law at the last session of the Legislature and the rise of board per week at the County Farm, has made a great difference in the expense of this department, the cost of maintenance of the poor at the County Farm this year, will be about twenty-five hundred dollars.

It seems to us that these men that run away and leave their wives and small children for the city to support, should be brought back and punished.

Also these men that have got families and won't work should be made to work and save the city lots of expense.

F. A. RAND,

Overseer of Poor,

Wards 2, 3, 4 and 5.

O. A. FLANDERS,

Overseer of Poor,

Wards 1 and 6.

LACONIA PUBLIC LIBRARY

REPORT OF THE TRUSTEES.

To the Honorable Mayor and City Council:

The undersigned, trustees of the Laconia Public Library, herewith transmit to you the annual report of Arthur W. Dinsmoor, Treasurer, showing the financial condition of the library for the year ending February 15, 1925, and the statistical tabulation of circulation and registration prepared by Miss Hazel J. Clark, Acting Librarian, for the year ending December 31, 1924.

An earnest effort has been made during the past year to expend the limited funds available for the purchase of new books and periodicals by selecting from a large list of desirable publications those which would prove of most interest to the local public. That some degree of success has attended this effort may be inferred from the fact that the general circulation at the library, the Lakeport Branch included, for 1924 exceeded that of 1923 by 6780. Additional funds could be used to great advantage in further increasing the beneficial use of the Library in our community.

Respectfully submitted,

WILLIAM F. KNIGHT,
STANTON OWEN,
ARTHUR W. DINSMOOR,
CHARLES L. PULSIFER,
FRANK P. WEBSTER,
FREDERICK W. FOWLER,
JOHN S. GILMAN,

Trustees.

REPORT OF TREASURER

To the Board of Trustees of the Laconia Public Library:

I herewith submit the treasurer's report for the year ending February 15, 1925.

SPECIAL FUNDS

ERASTUS P. JEWELL FUND

Amount on hand Feb. 15, 1924	\$695.75
Income	543.88
	\$1,239.63
Expended for books, see general fund	1,000.34
Balance on hand	\$239.29

HELEN A. AVERY FUND

Amount on hand Feb. 15, 1924	\$211.80
Income	39.79
Balance on hand	\$251.59

JULIA A. LADD FUND

Amount on hand Feb. 15, 1924	\$80.77
Income	22.50
	\$103.27
Expended for books	6.98
Balance on hand	\$96.29

WILLIAM ESTY FUND

Amount on hand Feb. 15, 1924	\$93.06
Income	42.50
	\$135.56

Expended for books, see general fund	13.37

REPORT of PARK COMMISSION

Laconia, N. H., February 1, 1925.

To the Mayor and Council of the City of Laconia:

Gentlemen:

For your consideration the Park Commission are pleased to submit their tenth annual report.

The season of 1924 at Leavitt Park Playground saw an increase in attendance and enthusiasm over all previous seasons. Mr. Charles Peterson, who had charge of the boys was exceedingly conscientious in his duties and work, adding new interest in track contests by means of certificates to be won on points. He also installed props and baskets for basketball and this proved to be quite an attraction, although with the shifting attendance of a public playground, it was rather difficult to keep a team organized.

Miss Jones, with the girls assistance, staged a simple pageant, which showed future possibilities along the same line; coached a large class in basketry, and awakened quite a little interest among the girls in basketball, also.

As to recommendations it is quite necessary that a suitable place be provided for storing all playground equipment. This could easily be arranged by using the basement in the ell of the house at the Park (installing a large locker, cementing the floor, and putting in an electric light); the tennis court should be lengthened, recovered and refilled where

it has been gutted by heavy rains; a place should be levelled and rolled for croquet ground, where it can be supervised by one of the directors; some arrangement should be made whereby the children can get to and from the beach, without discommoding those who own or occupy land between the playground and the beach.

There are numerous other recommendations which could be made along the line of a well equipped playground but these mentioned are made with a view of keeping in repair, and taking care of what has already been started.

The playground at Opechee Park was under the direction of Mr. Edward Warren, Jr., ably assisted by Miss Annabelle Dodds, both of Laconia.

The interest and enthusiasm the directors had in their work insured its success from the beginning of the season.

A well arranged program beginning with the flag raising and setting-up exercises at 9:30 each morning, included baseball, basketball, volley ball, croquet and swimming. The pleasure the young people took in all these health giving games and exercises was attested to by the large attendance throughout the season.

On the evening of August 7th, the boys and girls of the playground presented a pageant "The Magic Path." This entertainment was staged under the direction of Mrs. Elizabeth H. Hawley of New York, a representative of the National Playground and Recreation Association of America, the directors of the playground and a splendid committee of men and women interested in the young people of the city.

The pageant was enjoyed by a large and appreciative audience, and was so thoroughly successful that many who saw it expressed the wish that a

similar entertainment be given another year.

The boys annual over-night camping trip to Mt. Belknap was taken in company with a group of boys from Leavitt Park Playground. The night spent in the open proved an interesting experience to the directors as well as the boys taking the trip.

The older girls of the playground, under the care of Miss Dodds, enjoyed a two-day's camping trip to Lake Shore Park and were delighted with this outing.

During the last two weeks of the season, a doll carriage parade, a Teddy Bear parade, and circus parade served to interest the children and drew large audiences of interested friends and parents.

In August the directors of both playgrounds met with members of the Park Commission to discuss details of work, and consider plans. It is recommended that monthly meetings of the playground staff be held next season, in order that the work be strengthened and unified.

The value of supervised playgrounds is fully appreciated by the people of Laconia, and the City Council is generous in its appropriation for this work. It will logically follow that before many years we shall have an all the year round director of recreation, and thus provide supervised recreation for our young people for twelve months, each year, rather than for ten weeks as we are doing at the present time.

As suggested in our last report a small sum of money was expended for equipment at the South Main Street Playground, while no paid instructor was employed, your commission feel that the number of smaller children who made use of the provision made for their benefit would have justified a much larger expenditure of money.

Your commission would recommend that some

new equipment be installed this season and an instructor employed at least a part of each day.

United efforts of your honorable body and the commission ably aided by our citizens has placed a suitable entrance gate at Opechee Park and enclosed the westerly side of the park with an ornamental fence, we hope this may be continued this year and the entire area enclosed.

The commission wish to thank the various departments of our City Government and our citizens for their earnest efforts to make the playground movement a success in our city.

Respectfully submitted,

ALFRED C. WYATT,
LILLIAN P. DOW,
ALICE S. HARRIMAN,
WALTER E. DUNLAP,
FRANK S. PEASLEE,

Park Commissioners.

TRUST FUNDS

REPORT OF TRUSTEES

To the Auditor of the City of Laconia:

We respectfully submit our report for the year ending February 15th, 1925.

The trustees have, during the past year, visited the various cemeteries and personally examined each burial lot in connection with which the city is holding a trust fund for the care of the same, and have endeavored to authorize and apply in each case the expenditure of such portion of the available income as seemed advisable to most effectively preserve the lot and connections.

Watson M. Gray trust fund, for care of lot 149, Sec. 4, Bayside Cemetery.

June 9, 1899, deposited with city treasurer,	\$100.00
Income unexpended,	4.89

James R. Gray trust fund, for care of lot 572, Union Cemetery.

Nov. 28, 1899, deposited with city treasurer,	\$175.00
Income unexpended,	26.19

Adelia G. Maxfield trust fund, for care of lot 67, Hillside Cemetery.

Nov. 8, 1900, deposited with city treasurer,	\$100.00
Income unexpended,	47.71

Geo. L. Boynton trust fund, for care of lots 9 and 10, Sec. 5, Bayside Cemetery.

Nov. 8, 1900, deposited with city treasurer,	\$50.00
Income unexpended,	3.00

Cora M. Clay trust fund, for care of lot 164, Hillside Cemetery.

Aug. 16, 1900, deposited with city treasurer,	\$50.00
Income unexpended,	5.59

William E. Gray trust fund, for care of lot 97, Sec. 3, Bayside Cemetery.

Mar. 1, 1900, deposited with city treasurer,	\$50.00
Income unexpended,	5.18

Josiah Rundlett trust fund, for care of lot 434, Union Cemetery.

June 28, 1900, deposited with city treasurer,	\$75.00
Mar. 16, 1921, deposited with city treasurer,	\$25.00
Income unexpended,	4.00

John L. Perley trust fund, for care of lot 1, Union Cemetery.

June 28, 1900, deposited with city treasurer,	\$100.00
Mar. 16, 1921, deposited with city treasurer,	100.00
Income unexpended,	8.00

James M. Foss trust fund, for care of lot 21-22, Sec. 6, Bayside Cemetery.

Jan. 21, 1901, deposited with city treasurer,	\$250.00
Income unexpended,	12.76

Reuben P. Smith trust fund, for care of lot 45, Hillside Cemetery.

July 20, 1901, deposited with city treasurer,	\$50.00
Income unexpended,	2.90

John Knowlton trust fund, for care of lot 522, Union Cemetery.

Sept. 25, 1901, deposited with city treasurer,	\$75.00
Income unexpended,	3.00

William Taylor Batchelder trust fund, for care northerly half lot 516, Union Cemetery

Mar. 1, 1900, deposited with city treasurer,	\$75.00
Income unexpended,	15.12

Horace P. Batchelder trust fund, for care of one-half southerly
half lot 516, Union Cemetery.

Mar. 8, 1901, deposited with city treasurer,	\$37.50
Income unexpended,	6.04

David C. Batchelder trust fund, for care of one-half southerly
half lot 516, Union Cemetery.

Mar. 1, 1901, deposited with city treasurer,	\$37.50
Income unexpended,	7.55

Louisa Folsom trust fund, for care lot 46, Sec. 4, Hillside
Cemetery.

Feb. 15, 1902, deposited with city treasurer,	\$100.00
Income unexpended,	28.15

Maria Tilton trust fund, for care of lot 370, Union Cemetery.

Sept. 9, 1902, deposited with city treasurer,	\$500.00
Income unexpended,	103.97

Samuel C. Clark, Jr. trust fund, for care of lots 21 and 22, Sec. 2,
Bayside Cemetery.

AUDITOR'S REPORT

Laconia, N. H., March 5, 1925

*To the Honorable Mayor and City Council of
Laconia:*

I have examined the books and accounts of the City Clerk, City Treasurer, Board of Public Works, Collector of Taxes, Treasurer of the Public Library, and Trustees of Trust Funds, and find them correctly cast and properly vouched.

I desire to express my appreciation for all courtesies shown me and the ready assistance on the part of all your officials.

Respectfully submitted,

N. JOY HARRIMAN,

City Auditor.

SUMMARY OF VITAL STATISTICS.

Number of births	339
Number of births not previously recorded	14
Number of marriages	113
Number of deaths	196
Number of deaths occurring at Belknap county farm	3
Number of bodies brought here for burial	34

By Chapter 106, N. H. Laws of 1917, the Clerks of Cities and Towns are required to send a copy of every child's birth certificate to its parents, and if said copy is not received within sixty days from date of the child's birth, the parents should notify the City Clerk, in order that same may be placed on record.

Efforts have been made to make the records of vital statistics correct as possible. Should any error or omission be detected, the City Clerk will appreciate the kindness conferred by being informed of the same, that the records of the city may be made right.

EARL FLANDERS, *City Clerk.*
